# INTRODUCTION

## 1.1 MINIMUM SYSTEM REQUIREMENTS

### 1.1.1 Mac Requirements

- PowerPC G4 CPU, 128MB RAM
- eSATA: Mac OS X 10.3 or later
- FireWire: Mac OS X 10.2 or later
- USB 3.0 (backwards compatible to USB 2.0): Mac OS X 10.2 or later

### 1.1.2 PC Requirements

- 500MHz Intel Pentium 3 CPU, 128MB RAM
- eSATA: Windows XP or later
- FireWire: Windows 2000/XP or later
- USB 3.0 (backwards compatible to USB 2.0): Windows 2000/XP or later

### 1.1.3 Supported Drives

- Any 2.5" or 3.5" SATA hard drive or solid state drive (SSD).
- Any 9.5mm or 12.7mm slot-loading SATA optical drive.

## 1.2 PACKAGE CONTENTS

miniStack® MAX

Power supply

Power cable

FireWire 800  
(1394b) cable

USB 3.0  
(A to Standard-B) cable

**NOTE:** eSATA cable not included.

## 1.3 ABOUT THIS MANUAL

Firmware, images, and descriptions may vary slightly between this manual and the unit shipped. Functions and features may change depending on the firmware version. Please visit the product webpage for the most recent specifications.

## 1.4 FRONT VIEW

### 1.4.1 Front Features

- **SD card reader** — Insert any standard SD card into the slot, with the card's label facing to the right.
- **Optical drive** — Insert optical discs into the slot-loading optical drive on the front of the miniStack MAX. Supported optical media and read/write functionality will vary based on the specific model purchased.
- **Power LED** — The NewerTech miniStack MAX has a single LED at the front, located directly below the aluminum face. The LED will illuminate when the miniStack MAX is powered on.

## 1.5 REAR VIEW

## 1.5.1 Rear Features

- 1. USB charging port** — Connect any device that charges over USB. This port has no connectivity; it is used only for charging.
- 2. USB 3.0 hub ports** — Connect up to two additional USB devices here.
- 3. USB 3.0 uplink port** — Connect this port to your computer using the included USB 3.0 (A to Standard-B) cable to enable the USB 3.0 hub ports, the SD card reader, and the optical drive. If the eSATA or FireWire ports are not connected to your computer, the hard drive in the miniStack MAX will connect using this USB 3.0 port.
- 4. eSATA port** — If you want to use the hard drive in the miniStack MAX over eSATA, connect this port to your computer using an eSATA cable (not included). This eSATA port operates at SATA 2.0 (3.0Gb/sec.) speeds.
- 5. FireWire 800 (1394b) ports** — Connect one FireWire 800 port to your computer with the included FireWire 800 cable to use the hard drive in the miniStack MAX over FireWire 800. Use the other FireWire 800 port to connect additional devices.
- 6. Power input** — Connect the included power supply here.
- 7. On/off switch** — Turn the miniStack MAX on and off using this switch.
- 8. Security slot** — Attach a security tether here.

## 1.5.2 Connectivity Notes

- The hard drive in the miniStack MAX can connect using any of the three interface types (USB 3.0, eSATA, FireWire 800). The hard drive will always use the eSATA interface if it is connected. If eSATA is not connected, the hard drive will use FireWire 800. If FireWire 800 is not connected, the hard drive will use USB 3.0.
- In order for the USB 3.0 hub ports, the SD card reader, and the optical drive to function, the USB 3.0 uplink port must be connected to the computer.
- To connect additional FireWire devices through the miniStack MAX, you must connect one FireWire 800 port to the computer.
- For the safe removal of your drive and to assure that no data is lost, always eject or unmount the drive from your operating system before powering off.
- In order for the computer to access volumes larger than 2TB, the operating system needs to support large volumes (e.g., Windows Vista or Mac OS X 10.4 and above).

## 1.6 PRECONFIGURED

To help get things up and running quickly, the hard drive in your NewerTech miniStack MAX has already been formatted. For formatting information, including how to format your miniStack MAX for Mac or Windows, go to: <http://www.macsales.com/format>

# APPENDIX

## 2.1 FORMATTING

For formatting information, including instructions on how to format your miniStack MAX for Mac or Windows, go to: <http://www.macsales.com/format>

## 2.2 UNMOUNTING DRIVES

To properly unmount any connected drives from your computer, you need to follow a few simple steps.

### For Mac OS X systems:

There are two main methods to unmount disks with Mac OS X systems. Either drag the icon for the disk you wish to unmount to the trash can, or right-click the disk icon on the desktop, then click "Eject".

### For Windows systems:

1. Go to the System Tray (located in the lower right corner of your screen). Click on the "Eject" icon (a small green arrow over a hardware image).
2. A message will appear, detailing the devices that the "Eject" icon controls, i.e., "Safely remove..." Click on this prompt.
3. You will then be given the following message. "Safe to Remove Hardware". It is now safe to disconnect the NewerTech miniStack MAX from the computer.

## 2.3 TROUBLESHOOTING

Begin your troubleshooting by verifying that the power cable is connected to the NewerTech miniStack MAX and to a power source. If the power cable is connected to a power strip, make sure that the power switch on the strip is turned on.

Then, simply verify that both ends of your cables are properly plugged into the computer and the miniStack MAX. If the miniStack MAX is still not working properly, try connecting to another interface such as the USB connection and see if the device works properly. You can also connect the miniStack MAX to a different computer.

If problems persist, consult our online collection of frequently asked questions (<http://www.macsales.com/FAQ>) or see section 2.6 for information on contacting technical support.

## 2.4 ABOUT DATA BACKUP

To ensure that your files are protected and to prevent data loss, we strongly suggest that you keep two copies of your data: one copy on your NewerTech miniStack MAX and a second copy on either your internal drive or another storage medium, such as an optical backup, or on a second external storage unit. Any data loss or corruption while using the NewerTech miniStack MAX is the sole responsibility of the user, and under no circumstances will Newer Technology be held liable for compensation or the recovery of any lost data.

## 2.5 ONLINE RESOURCES

### Formatting:

For formatting information, including instructions on how to format your NewerTech miniStack MAX for Mac or Windows, go to: <http://www.macsales.com/format>

### Data Migration:

For a step-by-step walkthrough of our recommended method for migrating your data from an old drive to a new one, go to: <http://www.macsales.com/migration>

### FAQs:

Access our online collection of frequently asked questions for this and other products at: <http://www.macsales.com/FAQ>

## 2.6 TECHNICAL SUPPORT HOURS AND CONTACT INFORMATION

8AM - 8PM (CT) Monday - Friday

9AM - 4PM (CT) Saturday

By telephone: (800) 275-4576 (North America only)  
International customers please call: (815) 338-8685

Live chat is available during normal business hours as well.  
For more information, visit: <http://www.newertech.com/support>

Or you can email us. Submit your email at:

## FCC Statement:

Warning! Modifications not authorized by the manufacturer may void the user's authority to operate this device.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference with radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

## Health And Safety Precautions:

- Use proper anti-static precautions while performing the installation of your hard drives into this drive enclosure. Failure to do so can cause damage to your drive mechanisms and/or the hard drive enclosure.
- Read this user guide carefully and follow the correct procedures when setting up the device.
- Do not attempt to disassemble or modify the device. To avoid any risk of electrical shock, fire, short-circuiting or dangerous emissions, never insert any metallic object into the device. If it appears to be malfunctioning, contact Other World Computing technical support.
- Never expose your device to rain, or use it near water or in damp or wet conditions. Never place objects containing liquids on the drive, as they may spill into its openings. Doing so increases the risk of electrical shock, short-circuiting, fire or personal injury.

## General Use Precautions:

- To avoid damage, do not expose the device to temperatures outside the range of 5° C to 40° C (41° F to 104° F).
- Always unplug the device from the electrical outlet if there is a risk of lightning or if it will be unused for an extended period of time. Otherwise, there is an increased risk of electrical shock, short-circuiting or fire.
- Do not use the device near other electrical appliances such as televisions, radios or speakers. Doing so may cause interference which will adversely affect the operation of the other products.
- Do not place the device near sources of magnetic interference, such as computer displays, televisions or speakers. Magnetic interference can affect the operation and stability of hard drives.
- Do not place heavy objects on top of the device.
- Protect your device from excessive exposure to dust during use or storage. Dust can build up inside the device, increasing the risk of damage or malfunction.
- Do not block any ventilation openings on the device. These help to keep the device cool during operation. Blocking the ventilation openings may cause damage to the device and cause an increased risk of short-circuiting or fire.
