

Newer Technology Inc.

Newer Technology, Woodstock, Ill., a developer of PC, Macintosh and iPod performance upgrades and accessories, introduced Guardian MAXimus. Called the first low-cost FireWire and USB2 external RAID 1 storage solution for commercial and consumer use, the external storage solution works with any computer that has a FireWire 400, FireWire 800 or USB2 interface, and its hardware mirroring software provides line activity backup and data redundancy. A front-panel LED screen displays drive and status information.
