

↑ NewerTech Voyager

Clone, check or duplicate hard drives without prying open your computer case or dealing with meddlesome external hard drive kits with the Voyager. The unit allows you to insert a 2.5- or 3.5-inch SATA hard drive (up to 2 TB drives supported) and access the drive via its quad interface—Firewire 400/800, USB 2.0 or eSATA. Disks are hot-swappable (no reboots necessary) via the quick eject button and plays well with PCs and Macs..
