

NewerTech

NewerTech's **eSATA Extender Cable** helps MacBook Pro computers take advantage of two unused internal SATA ports on the motherboard, and add two external accessible SATA ports.

Users can expand their data storage

configuration to up to six hard drives.

Newer Technology Inc. also reports that its **Guardian MAXimus 300 GB** 10,000 RPM backup storage device has a triple interface for data transfer.

It features two FireWire 800 ports, one FireWire 400 port and a USB 2.0 port. It uses the Western Digital VelociRaptor SATA drive to deliver transfer speeds of up to 100 MB per second.

From Illinois-based Newer Technology Inc. (www.newertech.com).
