

miniStack 2.5

Newer Technology Inc.'s **miniStack 2.5** is an external FireWire 400/USB 2.0 powered drive. Operating on an Oxford 934 bridge chipset, the drive functions as a central desktop hub for connecting multiple devices, including scanners, printers, memory, card readers and more.

The miniStack has an auto-power on/off that synchronizes with a computer. The drive offers up to one TB of storage with 32 MB of disk cache.

The company also introduced its **NuPower** replacement batteries for Apple Inc. iBook computers.

From Newer Technology Inc. (www.newertech.com), which is located in Illinois.
